PROFESSIONAL SUMMARY

Software engineer with 4+ years of combined experience developing and supporting enterprise financial applications and healthcare software. Built Java/Spring Boot REST APIs, PostgreSQL workflows and reporting for a government financial platform at TCS, with testing, production troubleshooting and CI/CD release support using Git, Jenkins, Docker and Kubernetes. Current Innovision work spans React/Next.js, Python/FastAPI, Supabase/PostgreSQL and role-based access. Use AI-assisted coding, debugging and testing with review and validation of generated output.

PROFESSIONAL EXPERIENCE

Innovision LLC | Dayton, OH

Software Engineer (Full-time) Oct 2026 - Present

Software Engineering Intern Jan 2026 - Sep 2026

Experience across both roles

- Develop healthcare and AI application features using React/Next.js, Python/FastAPI and Supabase/PostgreSQL across application layers.
- Build REST APIs and frontend workflows for patient data intake, management and retrieval; develop authentication and role-based access features for clinicians and administrators.
- Reproduce user-reported defects and analyze application and system logs to isolate software and configuration problems; work with engineers on root-cause analysis and fix validation.
- Support deployments, updates and configuration changes on Windows and Linux; test application changes and verify their behavior after deployment.
- Use AI-assisted coding, debugging and testing workflows, reviewing generated code and validating results.

Software Engineer Nov 2020 - Aug 2024

Tata Consultancy Services | Kolkata, India

CFMS 2.0 (Comprehensive Financial Management System), a large-scale government financial platform supporting treasury and departmental workflows, distributed services, high-volume transactions, and mission-critical operations.

- Developed and maintained Java/Spring Boot REST APIs for treasury, payee, and e-billing modules in CFMS 2.0, spanning development, testing, deployment, and production support.
- Wrote and optimized PostgreSQL queries and batch jobs for financial workflows; built Jasper Reports and Excel automation for operational and financial reporting.
- Investigated production incidents using application logs, SQL, and debugging across code, databases, infrastructure, configuration, and deployments; worked with engineering, database, QA, and business teams on fixes.
- Used JMeter for performance and load testing, investigated bottlenecks and recurring failures, and tested application changes and defect fixes before release.
- Supported CI/CD builds and releases with Git, Jenkins, Docker, and Kubernetes in Linux environments, including configuration changes and post-release verification.

TECHNICAL SKILLS

Programming and backend: Java, Spring Boot, Python, FastAPI, JavaScript, SQL, REST APIs

Frontend: React, Next.js, HTML/CSS

Databases: PostgreSQL, Supabase, Microsoft SQL Server, Azure SQL, batch processing

Testing and troubleshooting: Postman, API testing, JMeter, software testing, debugging, log analysis, root-cause analysis, defect reproduction, performance investigation, production support

Systems: Linux/Ubuntu, Windows, Docker, Kubernetes; AWS/Azure/GCP (academic projects)

DevOps and delivery: Git, GitHub, GitLab, Jenkins, CI/CD, build and deployment automation

Reporting and access: Jasper Reports, Excel automation, authentication, role-based access control

Engineering foundations: Object-oriented programming and design, data structures, algorithms, databases, operating systems, SDLC, Agile/Scrum, Jira

ADDITIONAL EXPERIENCE

AI Quality Evaluator 2026 - Present

Handshake AI | Remote

- Evaluate LLM outputs for reasoning quality, factual accuracy, consistency, safety, and adherence to technical requirements.
- Identify errors, unsupported claims, inconsistencies, and edge cases through structured testing and evaluation.
- Analyze recurring failure patterns and document evidence-based findings with attention to accuracy and technical detail.

EDUCATION

University of Cincinnati | Cincinnati, OH Aug 2024 - Dec 2025

Master's in Information Technology | GPA: 3.97/4.0

Relevant coursework: Information Security and Assurance, Data-Driven Cybersecurity, Advanced Systems Administration, Azure Data Engineering, Advanced Algorithms, Infrastructure Sustainability, IT Project Management

Vignan's Foundation for Science, Technology & Research 2017 - Jun 2020

Bachelor of Technology in Electrical and Electronics Engineering | First Class with Distinction

ACADEMIC PROJECTS

IoT Home Automation System

- Developed Linux-based monitoring applications for IoT devices using REST APIs and cloud services.
- Built Python backend services for real-time device communication and system monitoring; used Git for source control and collaborative development.

University Academic Management Portal

- Designed a full-stack academic portal using React, JavaScript, HTML/CSS, and database design for academic management workflows.
- Conducted user analysis, wireframing, and HCI-driven usability evaluation to assess the portal and its interaction design.

ACHIEVEMENTS

- TCS CodeVita Season 13 | Global Rank 9,732 | Jul 2026 | Competitive programming, data structures and algorithms
